The ergonomic design makes the jug easy to hold, the grooves ensure a good grip, as the fingers will automatically search into the grooves.

You can pour from both sides or you can pour the jug forward, you choose what suits your needs.

The jug does not weigh much and therefore does not become too heavy when you pour liquid in.

The lid is designed to be open or closed.  
Open - you open up the liquid.  
Closed - turn the lid so that no insects can enter, if you e.g. take the jug with you outdoors.
